EUDX CONTEST ---> The fifth edition of the European DX Contest will be held on 1-2 February (from 12 UTC to 12 UTC). Complete information can be found on <https://www.eudx-contest.com>. The objective is for amateurs around the world to contact as many other amateurs in as many European Union regions and countries on 160, 80, 40, 20, 15 and 10 metres CW and SSB.

SV1GA/A ---> Fifty years after the initial activation, team SV1GA/A (K08SCA, OH2BH, OH2GEK, SV1GA and YO8WW) was QRV from a camp "up in the mountains" of Mount Athos starting around 16 UTC on 25 January. "Our Mt. Athos written amateur radio permit allows us to operate for 10 days", they stated, "which means that we will be on the air until February 3, 2025". However, they went off the air at around 9 UTC on 27 January amid controversy regarding the legitimacy of the operation.

"The matter of Amateur Radio in Mt Athos is in the hands of different entities within the Holy Community, and all we can do at this point is serve as

source of knowledge and expertise", Martti, OH2BH wrote on 29 January. "For us the key entity is the authority that issued our invitation/permit to carry out the SV1GA operation. Our paperwork is as clear as water, but outside sources have put everything on hold for further review".

On 30 January, Martti announced that, while awaiting a response from the local authorities that had issued their permit, the team had taken the decision to leave Mount Athos and return home. Some 13,500 QSOs have been uploaded to Club Log.

This will be a crossband activity, where XSG will operate CW on its authorized frequencies outside of the amateur radio bands, and amateur radio operators making contact will operate within their own allocated amateur frequencies.
